

The Med Spa at Rejuv

Erie's first all-inclusive beauty & wellness destination

Rejuv believes that beauty and wellness are a lifelong journey, not simply a destination.

Laser

PHOTOREJUVENATION is a treatment to improve sun damage, brown spots, red spots/vessels and rosacea.

ISÖLAZ® ACNE TREATMENT AND PORE CLEANSER clears up existing acne while helping to prevent future breakouts by removing blackheads, oils and debris. Additional benefits include reduction of pore size and improved skin tone/texture.

FRAXEL® SKIN RESURFACING gives you smoother and fresher looking skin. Fractional laser treatments target aging and sun damaged skin to improve tone/texture, reduce wrinkles and improve the appearance of scars. This treatment also helps treat melasma, surgical scars and stretch marks.

LASER HAIR REMOVAL involves a series of treatments to significantly reduce unwanted hair. Our pain-free technology is capable of treating both light and dark hair and patients with all skin tones. We treat all areas of the face and body.

SUBLIME SKIN TIGHTENING is a series of treatments used to promote Skin Tightening and Wrinkle Reduction. Common areas include the face & neck.

Injectables

BOTOX® and XEOMIN® are two types of FDA approved Botulinum Toxin that is injected into various muscles of the face to improve moderate to severe facial lines. Popular treatment areas include the forehead, between the eyebrows and around the eyes. Also done under the arms to treat excess sweating.

DERMAL FILLERS are used to correct facial lines, wrinkles, folds and some scars by increasing volume. They can also be used to enhance the lips and cheeks.

SCLEROTHERAPY lets you enjoy the freedom to show your legs. It is an injection of a sclerosing agent into the varicose vein causing it to collapse and gradually improve in appearance.

Treatments

PLATELET-RICH PLASMA (PRP) is the part of your blood that is rich in cells that release growth & healing factors which help promote Rejuvenation of Skin and Restoration of Hair Loss. Injecting PRP into specific areas can promote your own collagen to grow, regenerate tissue, thus acting to naturally smooth, plump and tighten skin. When injected into the scalp it can stimulate the shrinking hair follicles to enlarge and strengthen thereby reversing the thinning process and stimulates the follicle back into the growth phase to facilitate thickening.

THE SALTFACIAL™ Restores, Replenishes and Revitalizes the skin naturally. Three medical-grade technologies are used, including natural sea salt exfoliation, aesthetic ultrasound that delivers nourishing and hydrating formulas deep into the skin, and high-intensity LED Phototherapy that helps to rejuvenate the skin and promotes collagen stimulation.

HYDRAFACIAL® is the only hydradermabrasion procedure that combines cleansing, exfoliation, extraction, hydration and antioxidant protection simultaneously, resulting in clearer, more beautiful skin with no discomfort or downtime. The treatment is soothing, moisturizing, non-invasive and non-irritating.

MICRONEEDLE (Collagen Induction Therapy) is a medical treatment that triggers collagen production to improve wrinkles, scarring and stretch marks. It can also help to retexturize and tighten the skin.

CHEMICAL PEELS are a non-invasive exfoliating treatment used to improve various skin tone/texture problems including: acne, rosacea, hyperpigmentation and wrinkles. We offer a variety of peels for face, hands, neck/chest, eyes and lips.

VASERSHAPE™ is a relaxing, non-surgical treatment that temporarily reduces the appearance of cellulite, leaving your body smooth and beautiful. Also used for body contouring and fat reduction in problem areas.

When *medicine* meets *beauty* all things are possible...
